ESRS – GENERAL PRESENTATION

Chiara Del Prete

EFRAG SR TEG Chairwoman

Chair of the International Forum of Accounting Standard Setters

Confindustria

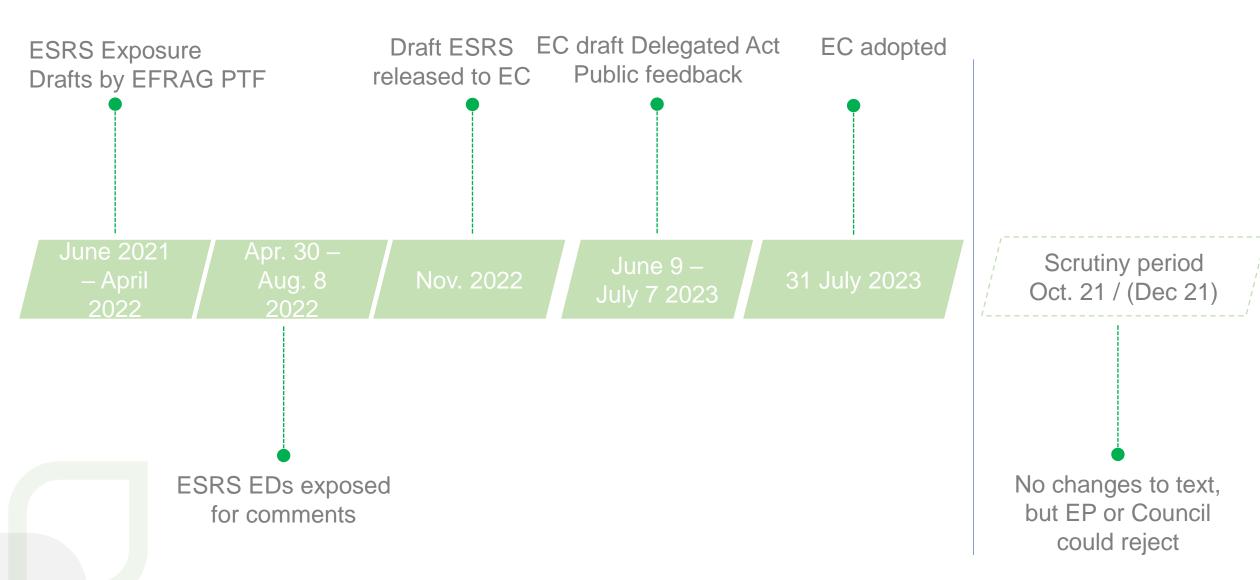

26 September 2023

Sector agnostic ESRS released as Delegated Act

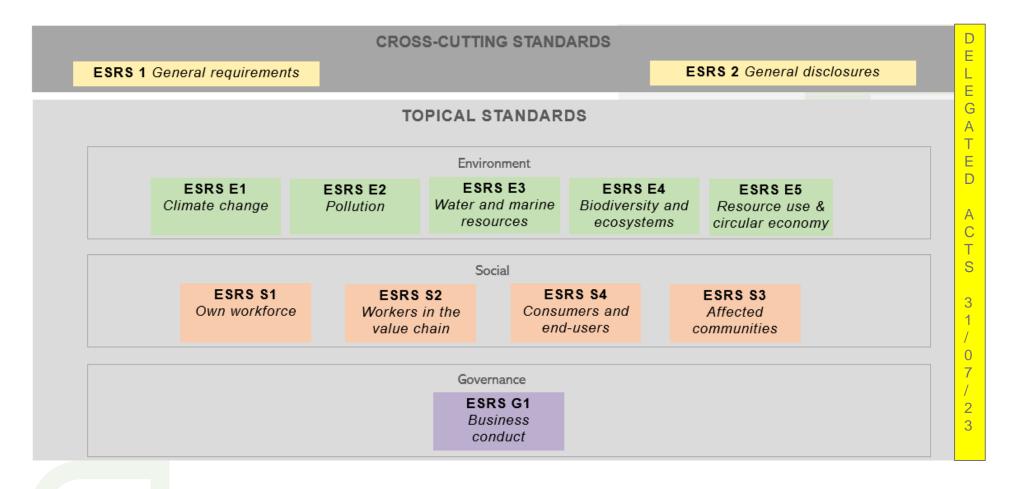

The sector agnostic standards on the finish line

The first set of sector agnostic ESRS elaborated by EFRAG

84 Disclosure Requirements

Qualitative or quantitative

Double materiality

- Financial materiality
- Impact materiality

4 pillars

- Governance
- Strategy
- Impact, risk and opportunity management
- Metrics and targets

... to be complemented by sector specific standards + SME standards (next steps)

The modifications introduced in the Delegated Act compared to the EFRAG November 2022 drafts

- Materiality: all standards, disclosure requirements and data points subject to materiality assessment
 - o ESRS 2 General Disclosures and related IRO-1 Disclosures of topical standards: always mandatory
 - o if Climate is considered not material have to explain + provide forward-looking analysis
 - o datapoints from EU legislation to mention "not material" if omitted

Phasing-in:

- ✓ undertakings with less than 750 employees may omit:
 - first year: scope 3 GHG emissions, all disclosures on own work force
 - first two years: all disclosures on biodiversity, value chain workers, affected communities, consumers and end-users
- ✓ All undertakings:
 - first year: anticipated financial effects on non-climate environmental issues, certain data points on own workforce
- <u>Voluntary disclosures</u> for example: biodiversity transition plans; certain indicators on «non-employees» in the workforce; explanations of non-materials topics
- Additional flexibility + coherence with EU legal framework + interoperability + editorial

ESRS Implementation Support

EFRAG non autoritative implementation guidance

- Providing non-authoritative guidance:
 - ✓ How to perform the materiality assessment?
 - ✓ How to address value chain disclosures under the ESRS?
- Normative chapters and FAQs
- Discussed in public meetings from SRB 23 August 2023
- Available for 4 weeks of public feedback when approved in draft (Q4-23 or Q1-24)
 - ✓ Inventory of datapoints in xls to perform a « gap analysis » (released jointly with the
 - XBRL taxonomy)
 - ✓ Other documents may follow in the next year(s)

See 23 August SRB meeting documents for latest DRAFT versions

EFRAG to support implementation with FAQ process

- Answering FAQs
 - ✓ Access point
 - √ Process to provide answers
- Facilitating access to relevant documents and education
- Under due process and in cooperation with EC

The pivotal role of the materiality assessment

Sustainability statements shall reflect all material impacts, risks and opportunities (IROs): under an objective approach with thresholds. Thus, not all sector agnostic standards may be applicable to an undertaking.

Reporting entity to implement a rigorous materiality assessment process to determine material IROs (inc understanding of its value chain). This will be subject to audit.

Value chain: focus on where in the VC material IROs arise

Information shall be extended to include information on the material impacts, risks and opportunities connected with the undertaking through direct and indirect business relationships in the upstream and/or downstream value chain ("value chain information"). (ESRS 1 para 63)

* Impacts include those connected with its own operations and value chain, including through its products and services, as well as through its business relationships

Scope of the Reporting undertaking (OWN OPERATIONS) is the same as for the related financial statements

VALUE CHAIN (upstream and downstream) IRO BASED

If after **reasonable effort** undertaking unable to collect VC information, it shall be estimated.

Examples: data from indirect sources, sector-average data, sample analyses, market and peer group data, other proxies

- Except very few, most of the metrics in the topical standards do not cover value chain
- Policies, actions and targets, include value chain information to the extent that those PAT involve actors in the value chain
- Requirement to integrate standardised information with entity-specific disclosures including on value chain, when necessary

Interoperability with IFRS SS and GRI

Interoperability with IFRS S1 and S2

International Sustainability Standards Board (ISSB)

- Architecture: 4 pillars TCFD
- Aligned definitions financial materiality and value chain
- All requirements in IFRS S1 included in ESRS 1 and 2
- All datapoints of IFRS S2 included in ESRS E1
- ESRS E1 includes also additional disclosures not included in IFRS SS due to European law and ambitions

Continuous ongoing cooperation, including on digital interoperability

ASSESSMENT OF INTEROPERABILITY, EFRAG SRB 23 AUGUST 2023:

EFRAG assesses a <u>very high degree of</u> <u>interoperability</u> between the two sets of standards.

ESRS preparers will to a very large extent report the same information as companies that use ISSB standards; and

This significantly reduces the risk that ESRS reporters will have to report the same information twice.

EFRAG has published a mapping table for between ESRS E1 *Climate Change* and IFRS S1 and S2 – see SRB 23 August for the docs

Interoperability with GRI

Global Reporting Initiative

- Technical cooperation from the beginning of EFRAG PTF
- Aligned key concepts: impact materiality, due diligence
- GRI reporters well prepared to report on impacts under ESRS

Continuous ongoing cooperation, Next steps:

- Reconciliation ESRS with GRI disclosures
- Digital interoperability

EFRAG and GRI agreement:

A high level of interoperability has been achieved in respect to impact reporting

Entities complying with ESRS considered reporting with reference to GRI Standard (as defined by GRI 1)

EFRAG and GRI have issued on September 4th 23
Joint statement of interoperability

EFRAG developments ahead

- First paragraph -> the description of the Disclosure Requirement
- Second paragraph: -> the objective of the disclosure requirement (principles-based approach)
- Following paragraphs: the specific datapoints to be included (« shall ») under a, b, c..., subdivided, if need be, as (i), (ii), (iii)... (non-limitative list)
- + Application requirements

... facilitating digitisation

- Digital XBRL taxonomy underway at EFRAG, facilitating usability and comparability of ESRS statements in the ESAP
- Draft version will be available <u>for public consultation in Q4-2023 or Q1-2024</u>, enabling digital tagging and « taxonomy-centric » report preparation
- Tagging aligned with standard structure allowing for 3 levels of reading:
 - ✓ Level 1: Disclosure requirement level
 - ✓ Level 2 (« nested »): a, b, c ...
 - ✓ Level 3 (« nested »): (i), (ii), (iii) ... (when required by ESRS)
 - ✓ Quantitative (numerical) and semi-narrative tags (Yes/No, Dropdowns) on all levels

High priority in EFRAG current workplan: SME

Listed SMEs
LSME
Standard
(CSRD)

Legally binding Art. 29 c and Art. 19 a6

- SMEs between 10-250 employees (plus turnover and capital criteria) that are listed [about 700 listed companies in EU]
- Small non-complex banks (about 2,300)
- Captive insurance and reinsurance (about 300)

Delegated Act

Voluntary
Standard VSME
(SMEs not in
CSRD scope)

Not legally binding but to be used to fulfill market needs

SMEs not listed [22 *million* including micro] outside CSRD scope that want to voluntary disclose

Aim: to help SMEs in taking the first steps in ESG reporting.

No Delegated Act

CSRD specifies reporting requirements for listed SMEs. Art 19 a(6) by *way of derogation*. This is a reduced list from the requirements that will apply to other companies under scope:

- A brief description of the undertaking's <u>business</u> <u>model and strategy</u>
- b) A description of the undertaking's <u>policies</u> in relation to sustainability matters
- c) The principal actual or potential <u>adverse</u>
 <u>impacts</u> of the undertaking with regard to
 sustainability matters, and any <u>actions taken</u> to
 identify, monitor, prevent, mitigate or remediate
 such actual or potential adverse impacts
- The principal <u>risks</u> to the undertaking related to sustainability matters and how the undertaking manages those risks
- e) Key <u>indicators</u> necessary to the disclosures referred to in points (a) to (d).

VSME has no legal role and does not impact the cap.

The Draft LSME ESRS will define the limit of information that EFRAG may request from large undertakings, in line with art 29b(4) CSRD.

Consultation in Q4-23 or Q1-24

EFRAG needs critical input on VSME

EFRAG VSME Workstream

SMEs will adopt this standard to the extent that there is a market acceptance for it to present the common set of needed data for investors, lenders and other counterparties in the value chain

- EFRAG's work on a voluntary standard for non-listed micro, small and medium companies (VSME) is **outside the mandate defined in the CSRD and derives from the market need** to have a common point of reference to be used by counterparties in the upstream value chain of SMEs and by lenders, when they define their data requests from non-listed SMEs and to support non-listed SMEs in the start of their sustainability journey.
- This market need was highlighted in the <u>EC impact assessment accompanying</u> the CSRD proposal and confirmed by EFRAG LAB (Final Report 2021) and by former <u>EFRAG PTF cluster in charge of SMEs</u> that was composed by representatives of SMEs and banks.
- Following the feedback from stakeholders regarding ESRS and the need for a standardized VSME, Commissioner Mc Guinness and the European Commission recommended EFRAG to work on a [draft] VSME.

Sector ESRS – 39 Exposure Drafts in the coming years Starting from high-impact sectors and financial institutions

2024 2025 2026

- SEC 1 Sector classification
- Mining, Oil and Gas, Agriculture, Road Transport

 Textiles, Food and beverages, Energy and Motor vehicles EFRAG Secretariat will complete the drafting of the other sector ESRS

Financial institutions (banking, insurance, asset management) to address also value chain specificities Appy to Advisory Panel by 15 Sept. 23

Sector standards are being developed over a period of 4/5 years (2022-2026) and are **complementary to sector-agnostic**

Illustrative timeline – timetable to be confirmed

ESRS for non-EU groups

- At group level of <u>ultimate third-country parent undertaking</u>
- Art. 29 a 2 Points (a)(iii) to (a)(v) plans and actions to ensure bus model and strategy compatible with 1,5 °C, how the strategy and bus model take account of stakeholders' views and interests and how strategy has implemented with regard sustainability matters
- Art. 29 a 2 Points (b) to (f) targets, governance bodies, policies, incentive schemes, due diligence, material IROs, actions

- NON-EU COMPANIES IN SCOPE Net turnover > EUR 150 million and:
- with a subsidiary in the EU that follow the criteria applicable to EU companies (i.e., being listed on the European market except micro or being within the large company threshold) or
- with a branch in the EU generating more than EUR 40 million net turnover

• Art. 29 a 2 where appropriate, indicators for the above.

Effective from 2028, EFRAG will work on it after SME and first batch(es) of Sector ESRS

Thank you!
